

## YHIP 2019 Report

<http://plasticsheritage2019.ciuhct.org/yhip-participants/>

The **YHIP 2019** Summer School/Research Seminar “Perspectives in Historic Polymeric Materials” was held from 27 until 28 May 2019 at the FCT/UNL (Science and Technology Faculty, New University of Lisbon) at Caparica Campus.

It was suggested by Günter Lattermann and perfectly organised by Maria João Melo, Eva Mariasole Angelin, Elvira Callapez, Artur Neves and Susana Sá.

In total 24 participants, including 14 Yhips (**Y**oung **H**ipom **P**rofessionals: graduate and PhD students, post-docs, with 5 oral and 7 poster contributions), 3 distinguished keynote speaker (Robert Friedel, Günter Lattermann and Anita Quye), two further discussion leaders (Joana Lia Ferreira, Gabriele Oropallo) and the organising committee, experienced a very interesting two day’s seminar with a broad spectrum on plastics heritage.

Together with the keynote lectures on historic polymeric materials, their conservation and socio-historic relevance, the fruitful multidisciplinary discussion on Hipoms, the development of relevant future investigations and research and finally the new personal contacts made **YHIP 2019** a very creative, inspiring, successful event in a very pleasant atmosphere.
